WATER SUPPLY ENGINEERING SECTION
CONSTRUCTION PERMIT APPLICATION
Water Service Agreement

INSTRUCTIONS

This agreement must be executed for all projects where construction and water supply will be provided by different parties; i.e., a private subdivision connecting to a municipal system. This agreement must be executed by the parties who are owners at the time the permit is issued, regardless of whether title to the proposed construction project will be transferred after completion of the project.

This agreement is not necessary when a contract for water services already exists; i.e., service contracts between municipalities. However, the Department of Natural Resources must be informed in writing that the contractual agreement does exist.
